

ENVIRONMENTAL POLICY

Shred Easy has implemented an Environmental Management System certified to ISO 14001

Our customers are entrepreneurs - from sole proprietorships to medium-sized companies to large companies of all types and sizes. In addition, medical practices and therapists, tax advisors, lawyers and private individuals entrust us with the secure destruction of their data media.

We take a corporately responsible approach towards the community and that of the environment with sustainable practices that reflect our company values. By taking a lifecycle approach and considering the impacts of climate change our commitments are to protecting the environment, conserving natural resources, preventing pollution, fulfilling compliance obligations and continually improving our environmental performance.

We will achieve this by setting, communicating and monitoring appropriate objectives in the following:

- Awareness and training of workers in environmental and cultural heritage issues
- Waste management protocols
- Minimising the risk of pollution events
- Health and wellbeing
- Alignment with the United Nations Sustainable Development Goals
- Measuring and setting reduction targets for our Scope emissions and carbon footprint.
